

# Types of CSS

Cascading Style Sheet(CSS) is used to set the style in web pages that contain HTML elements. It sets the background color, font-size, font-family, color, ... etc property of elements on a web page.

There are three types of CSS which are given below:

**Inline** - using the style **attribute** in HTML elements

**Internal** - using the <style> **element** in the <head> section

**External** - using an external CSS **file**
